PROFESSIONAL SUMMARY

Computer Science graduate from Saudi Electronic University with a foundation in software development, databases, web technologies, and IT support. Skilled in Java, JavaScript, SQL, HTML, CSS, Bootstrap, Git, and GitHub, with practical web projects deployed through GitHub Pages. Completed cooperative training with exposure to technical support, SQL Server, database operations, and business software environments. Seeking an entry-level opportunity in software development, information technology, systems, or technical support in Saudi Arabia.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL

Web Development: HTML, CSS, Bootstrap, Responsive Web Design, DOM Manipulation, Event Handling, LocalStorage

Databases: SQL, SQL Server, Relational Database Concepts

Tools & Platforms: Git, GitHub, Visual Studio Code, Command Line, GitHub Pages

IT Fundamentals: IT Support, Technical Troubleshooting, Software Installation and Configuration

Currently Learning: React, Node.js, Python, Django, REST APIs, MongoDB, Full-Stack Web Development

COOPERATIVE TRAINING

Cooperative Trainee - IT Support & Systems | Authorized Al-Ameen Accounting Software Agent & IT Services Provider

- Assisted with day-to-day IT support and technical troubleshooting tasks.
- Gained exposure to SQL Server, database backup operations, and business software environments.
- Assisted with software installation, configuration, and client technical support.
- Gained practical exposure to Al-Ameen Accounting Software and related database operations.

PROJECTS

Personal Portfolio Website | HTML, CSS, JavaScript, Bootstrap

- Designed and developed a responsive portfolio website to present technical skills, education, cooperative training, and software projects.
- Applied responsive web design practices and deployed the completed website publicly using GitHub Pages.

LIVE DEMO | GITHUB REPOSITORY

TaskFlow - To-Do List Web Application | HTML, CSS, JavaScript, LocalStorage

- Built a responsive task management application with task creation, editing, deletion, completion, search, and status filtering.
- Used JavaScript DOM manipulation and event handling to implement interactive task management functionality.
- Implemented browser LocalStorage to persist task data across browser sessions and deployed the application with GitHub Pages.
